Professional Summary

Results-driven Data Analyst with 5 years of experience developing scalable data solutions using Python, SQL, and Power BI. Specializes in transforming large datasets into clear reports and designing self-service dashboards that enhance operational efficiency. Skilled in identifying data inconsistencies and implementing process improvements to ensure data integrity.

Skills

- Problem-solving
- API integration
- Python coding
- Data programming
- Strong work ethic
- Database management
- Programming
- Application development
- SQL
- Data validation
- Clear and concise communication
- Database programming and SQL

Work History

Data Analysis and Data Visualization Developer Apprentice Aug 2025 to Jan 2026

MORGAN STANLEY – Manhattan, NY

- Developed applications using Python, SQL, Java, and JSON for data analysis, implementing data cleaning processes on large data sets to enhance data quality.
- Processed large data sets of over 10,000 rows by writing transformation scripts and applying data cleaning techniques, exposing new attributes for downstream analysis.
- Processed large data sets containing over 10,000 rows by writing transformation scripts, applying data cleaning techniques and exposing new attributes for downstream analysis.
- Collaborated with development teams to create data visualization tools, transforming complex information into interactive dashboards and actionable insights.
- Collaborated with development teams to create data visualization tools, transforming complex information into interactive dashboards that provided actionable insights.

Data Entry Associate Jan 2020 to Mar 2025

B&A APPLIANCES (FAMILY BUSINESS) – Brooklyn, NY

- Processed up to 50 records in the busiest month, ensuring accurate and timely data entry while maintaining data integrity across company systems.
- Managed and organized project data using Google Workspace and Microsoft Office 365, improving accessibility, collaboration, and workflow efficiency.
